

Clinton Garwood

Python Developer, Software Design & Full Stack Development

I enjoy designing practical, yet inspired and accessible technology, and have diverse team and organization experience. Learning how to align project documentation with industry best practices led me into ai-prompting almost two years ago. Since then, prompt-engineering, LLM design and access, and machine-learning have been my continuing education and skill development focus.

Skills Focus

Open Source Application Development

I have released numerous open-source productivity and general purpose data management apps. These apps come in a variety of stacks, and serve as template apps others can extend into personal applications or organizational projects.

University Faculty, Computer Science

Develop and teach undergraduate programming, web development, and full-stack classes online and in-person. For five years I have taught Python in Introduction to Programming classes and routinely introduce Linux VMs (Ubuntu and Kali) to students.

Joliet Junior College, Joliet IL, 7-years

University of St. Francis, Joliet, IL 2-years

North Central College of Engineering, Naperville IL, 2-years

Full Stack Languages, Libraries and Databases

Frontend: HTML, CSS, JavaScript, Bootstrap, jQuery

Backend: Python, Flask, Node.js, PHP, Java, C, C++, C#

Data Store: Atlas/MongoDB, JSON, MariaDB/MySQL, MS-SQL Server, SQLite

Operating Systems & Hardware

Operating Systems: Android, Linux Ubuntu, Kali, MacOS/iOS, Windows

Hardware: Arduino, Embedded Systems, Raspberry Pi

Virtualization: Hadoop, VMWare Workstation, VirtualBox

Cloud Computing & Infrastructure

Cloud Providers: Amazon AWS (Rt 53, S3, EC2), Microsoft Azure (IaaS, PaaS), Oracle Cloud

Cloud Tools & Hosting: Docker, GoDaddy (IIS, cPanel), IBM Watson for IoT, Network Solutions (Hosting, MX), NGINX, Apache Tomcat
