

# Clinton Garwood

## Partnership Specialist, Full Stack Expertise

For nearly two decades, I have developed and implemented national brand strategies for numerous organizations in consumer, trade, and scientific markets. A decade ago I proactively formalized my skills in programming, which resulted in faculty appointments teaching software engineering, and full stack web development at the university level.

I maintain a voluminous collection of skills-demonstrations as screen-recordings that demonstrate a pathway to extend my open source demo apps like those linked below.

### Roles, Experience

[Experience Summary](#)

[Faculty Joliet Junior College](#)

[Strategy Consultant](#)

[Visiting Scientist USGS](#)

### Degrees, Certifications

[See the Full List](#)

[MS Governor's State](#)

[University of Washington](#)

[AAS Joliet Junior College](#)

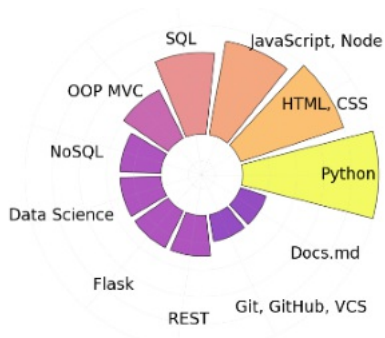

### Applications Built as Tutorials/Labs

[Open Source Apps](#)

[Python/Flask/MongoDB](#)

[Browser Notepad App](#)

### Skills Focus

### University Faculty, Computer Science

End-to-end course development and undergraduate instruction in programming, web development, and full-stack classes online and in-person. Ongoing development of full-stack tutorial-applications.

Joliet Junior College, Joliet, 7-years

University of St. Francis, Joliet, 2-years

North Central College of Engineering, Naperville, 2-years

### Corporate and Agency Experience

More than a decade of experience as a national publicity PR agent. Define brand strategy and coordinate interviews, media tours, press conferences, VNR SMT RNR B-Roll and social media outreach.

Agency Experience: GarwoodPR, Marketing Support Inc., Golin/Harris, Weber Shandwick

Client List (partial) Florida Orange Juice FDOC, McDonald's in partnership with NBA, Walt Disney Studios, Rollerblade, Energizer, Owens Corning, ACCO Swingline, Henry Company, Kwikset Black & Decker.

### Technical Proficiency:

Productivity: Microsoft Office, Google Suite, Libra

Frontend: HTML, CSS, JavaScript, Bootstrap, jQuery

Backend: Python, Node.js, PHP, Java, C, C++, C#

Data Store: Atlas/MongoDB, JSON, MariaDB/MySQL, Microsoft SQL Server, SQLite, AWS S3, Oracle Cloud

## Experience Profile: Visiting Data Scientist with the USGS

Highlights of the unique research collaboration established between the United States Geological Survey and Joliet Junior College to study Asian Carp behavior in North America.

---

### University Faculty Liaison and Research Partner

In 2018, I joined the USGS as a visiting scientist, working alongside Dr. Patrick Mills Ph.D., then Chair of the Natural Sciences Department at Joliet Junior College. Together, we built a collaborative research partnership between JJC and the USGS, focusing on the impact of Asian Carp in the Mississippi River watershed and Great Lakes region.

This multi-year partnership marked the first of its kind between a community college and the USGS, resulting in original research, multiple poster presentations, and ongoing opportunities for JJC students to engage directly with the U.S. Department of the Interior.

### Partnership Building, Relationship Management

Maintain direct communication with our USGS Research Liaison. Engage in annual program planning and participate in project-level research development sessions.

Participate in press conferences, media interviews, and summits to discuss research achievements and partnership milestones.

### Programming, Data Science

Support teams and individuals in programming languages such as R, C++, Java, and Python (SciPy, Numpy, Pandas), including assistance with web interface development and the use of IoT/micro-sensory data collection devices.

Guide undergraduate students in scientific research methods and data science fundamentals. Supervise students working with USGS-managed data from various laboratory and field studies.

Conduct analyses on diverse datasets, including text files, CSVs, spreadsheets, video footage, and sensory data, utilizing statistical and computational methods.

Prepare field research associates (students) with equipment training, testing protocols, and safety measures for fieldwork.

### Highlight: Machine Learning Training; Spring 2021

Location: Columbia Environmental Research Center (CERC), USGS, Columbia, MO. Attended a professional training on Noldus machine learning video analysis software, with a focus on feature identification, data processing, and study analysis.

### Highlight: Original Laboratory Research Projects; Summer 2020

Profile: Supervised two three-week external research internships.

Location: Columbia Environmental Research Center (CERC), Columbia, MO

Partner: United States Geological Survey, U.S. Department of the Interior

Focus 1: Analyzed Grass Carp feeding behavior using a forty-bay aquarium setup.

Focus 2: Conducted a retention study with ARIES sonar in a pond setting, examining fish responses to amino acid-enriched feed.
